FLOWER SEEDS

1948

DEC 23 1947
U. S. Department of Agriculture

We are on the threshold of a new crop of improved varieties of flower seed. During the War, production of novelties was at a stand-still, and it has taken the last two years to give the polishing touches and tests of the latest productions — some of which are listed on the opposite page. Just as soon as others are tested and in our opinion "commercial", we shall list them for you.

In addition to seed, *Gloeckner* bulbs, plants and cuttings are selected with diligent care as to type, productiveness and freedom from disease so you may have the best upon which to build your prospective crops.

COVER MAN 1948

A facsimile of our current catalogue cover, with the year plainly marked, is attached to every package of seeds, and is your guarantee that the seed therein is fresh from this year's crop.

Harrison H. Scholl was born in Allentown, Pa., in 1866. For a number of years he was engaged in farming with his father, but his interest in flowers drew him away. He worked for Yeager the Florist of Allentown, for four years and then went into business for himself. He and his son are now associated in business for 29 years.

BUSINESS TERMS

2%, 10 DAYS, 60 DAYS NET FOR CUSTOMERS OF APPROVED CREDIT

Prices in this catalog are subject to change without notice . . . All goods are offered subject to Crop Failures, Shortages or other causes beyond our control, and to being unsold on receipt of order . . . The prices in this catalog are for the trade only. For your own protection do not loan this catalog to anyone not entitled to Florists or Wholesale prices . . . Unknown correspondents desiring to open an account are requested to furnish three trade references with whom they have had credit relations.

We, Fred C. Gloeckner & Co., Inc., give no warranty, expressed or implied, as to the productiveness of any seeds, bulbs or plants we sell and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price.

FLOWER SEEDS

1

Outstanding Selections

THAT DESERVE SPECIAL CONSIDERATION

Sweet Pea

Cuthbertson

Here is a pea specially developed for flowering in hot weather. As a class this takes the place of the Spring Flowering types offered in previous years.

The Cuthbertson varieties will flower out of doors two weeks later than the Early flowering types, and two to three weeks earlier than the Summerflowering Spencer. Their advantage is that they will continue to produce an abundance of long stemmed flowers well into the hot summer.

Under glass it is recommended to sow after November 1st, making sowing until the middle of December. Space further apart and allow more head room than you would for the Early Flowering.

Carol—Strong growing long stemmed clear pink.

Coline—Strong growing sunproof scarlet.

Danny—Navy blue.

David—Bright rose crimson. Strong growing.

Evelyn—Outstanding salmon cream pink.

Frank G.—Best shade of lavender.

Hazel—Clear light blue.

Janet—Bold flowers of pure white. Black seeded.

Jessie—Wavy flowers of satin mauve.

Katie—Rose cream pink on a cream ground.

Lois—Wavy blossoms of clear rose pink on white ground.

Marion—Extra long stemmed deep cream.

Tommy—Clear medium blue.

1/2 oz. \$.35

1 oz.65

1/4 lb. 1.75

Petunias

Pan American All Doubles

An entirely new strain of double petunias developed and produced in the United States. Trials of last year proved them to be outstanding.

Allegro—Large, fully double flowers of clear, deep salmon.

Minuet—Lavender-Orchid.

Nocturne—Semidouble, deep Elk's Pride purple.

Sonata—Large fully double, pure white flowers.

Caprice—Dwarf-growing, deep rose.

Tr. Pkt. (1000 seeds)..... \$ 4.00

1/64 oz. 13.00

1/32 oz. 25.00

Glorious Mixture—Contains all above separate colors in mixture.

Tr. Pkt. (1000 seeds)..... \$ 3.50

1/64 oz. 12.00

1/32 oz. 21.00

Naughty Marietta

Dwarf Single French

Single flowers to 2½ inches across. Rich golden yellow in color with an attractive maroon blotch at the base of the petals. Flowers are freely borne on compact plants 1 foot tall. Extra good for borders or beds. Early. An All-American winner.

FLOWER SEEDS

Outstanding Selections

THAT DESERVE SPECIAL CONSIDERATION

Re-Introductions From World Wide Sources

As the catalogue goes to press we have been advised we shall receive a small number of varieties of European Flower seeds that have not been available through American growers. These represent some of the better old varieties not available during the war — you will remember many of them as you run down the list.

Aster Crown—Crimson with white center.
Rose with white center.
Light blue with white center.

Aster, Imbricated pompon—Fiery scarlet.
Light blue.
Rose.
Dark Blue.
White.

Calceolaria—Pumila, dwarf tigered.
Multiflora nana, Golden Tiger.

Exacum—Affine atrocoeruleum.

Gomphrena—Aurea superba.

Impatiens—Holstii, Nana Leignitzia

Marigold Liliput.
Brown.
Golden yellow.
Sulphur yellow.
Yellow and Brown.

Petunia—Grandiflora Queen of the Market.
Grandiflora compacta Gottfried Michaelis.
Hybrida grandiflora Silver Edged.
Hybrida Ladybird.

Dahlia Vosberg Hybrids

Specially selected for long stems, large blooms and long lasting flowers. This hybrid produces flowers about twice the size of the Coltness. Range of colors is predominantly of the brighter cerise and pink shades. Flowers are single and the plant is tall growing.

Tr. Pkt.	Oz.
\$.50	\$2.50

Scabiosa

Imperial Hybrids Mixed

A new series of colors coupled with extra long stiff stems make this new introduction an important cut flower variety.

The variety Blue Moon was selected from the original stock that produced this series. The flowers are therefore of the same large size as Blue Moon. The pastel shades are predominant and are the most outstanding feature of these hybrids.

Tr. Pkt.	Oz.
\$.35	\$2.25

Cosmos Radiance

Introducing a new color in the Sensation type. This is a striking deep rose and rich crimson bicolor. Winner of the highest award in the 1948 All America trials.

Tr. Pkt.	Oz.
\$.50	\$2.50

Quantities will be limited the first season, orders will be priced at market.

Antirrhinum

Winter Snapdragons For Greenhouse Culture

Early flowering varieties of Antirrhinum have been developed through constant breeding. They are not the largest flowering but are of medium size which have been in favor with the retailer. For Spring flowering the varieties producing larger spikes should be grown.

Windmiller's Lilac — Excellent orchid color	1.50
Schumann's Lavender	2.00

Seed should be sown late in June or early July for Winter flowering. High temperature inhibits germination of the seed and one must, therefore, select a cool location for the seed flats.

Damping off is a serious problem and all precautions should be taken to avoid it. The soil should be sterilized with steam or other efficient measures, and after the seed germinates good circulation of air and very little watering will help to prevent this trouble.

Experiments have shown that Snapdragons do better if the fertilizer content in the soil is not very high. This is one of the easiest crops to grow when planted in fresh soil and grown in a well ventilated cool greenhouse. SNAPDRAGON WILT is usually caused by a single, soilborn fungus—Verticillium, which also causes Seidewitz Disease or wilt of Chrysanthemums. The only positive prevention for this disease lies in the exclusive use of sterilized soil, from the seed flats to the final potting or benching soil. Do not invite trouble by planting this crop in old mum soil unless it is first sterilized.

Single Chinensis (Wilt Resistant)

Plant 1½ to 2 feet tall, flowers daisylike, petals wide and closely placed, blooms in late August.

	Tr. Pkt.	1/4 oz.	Oz.
Rainbow Mixture — Special florist strain	\$.25	\$.45	\$ 1.65

FLOWER SEEDS

Princess Type (Wilt Resistant)

A very attractive new cutting type of wilt resistant Aster, 2' - 2½' tall, branching and free flowering, early blooming, bearing quantities of flowers on strong stems. Flowers have a full deep crested center, surrounded by several rows of dainty plume-like guard petals. Blooms mid-August.

	Tr. Pkt.	1/4 oz.	Oz.
Anne —Peach blossom	\$.50	\$.85	\$ 2.75
Bonnie —Soft salmon rose.....	.50	.85	2.75
Marsha — Rich cinnabar scarlet50	.85	2.75
Mixed50	.85	2.75

Aurora (Wilt Resistant)

A splendid free flowering Aster, with large flowers, quilled centers and outer band of broad petals. Height 2 feet, fine for cutting. Blooms late August.

	Tr. Pkt.	1/4 oz.	Oz.
Golden Sheaf — Yellow.....	\$.40	\$.60	\$ 1.85

Super Giant (Non-Resistant)

This is the largest and most fully double Aster class known: The flowers are full petaled, graceful interlacing. Plants about 2½ feet tall, with six to eight long, non-lateral stems per plant.

	Tr. Pkt.	1/4 oz.	Oz.
El Monte —Crimson	\$.40	\$.85	\$ 3.00
Los Angeles —Shell pink.....	.40	.85	3.00

Begonia

Soil to be used for seed flats should have two parts leaf mold, two parts well rotted manure, two parts soil and one part sand. Steam sterilize the flats and soil about one week before sowing, also water the soil well before sowing. For four inch plants for Spring sale sow seed in August. If 2½ inch plants are wanted for Memorial Day, sow seeds in December. Many growers make monthly sowings from August to March.

For potting soil use the same mixture as above but add more soil and a three inch pot of Electra or complete fertilizer, to 2½ bushels of soil.

Begonia seed will germinate better in a temperature of 60-70° F. Grow Begonias in 55° temperature.

Mite, Nematode and Aphis are sometimes troublesome.

	Tr. Pkt.	1/64 oz.	1/32 oz.
Adeline —Dwarf bright pink.....	\$1.00	\$2.50	\$4.50
Carmen —Compact well formed variety with greenish bronze foliage and clear rose pink flowers	1.00	2.25	4.00

White Pearl —White	1.00	2.50	4.50
Scandinavia — Free flowering. Bright rose pink	1.00	2.75	5.00
Tuberous Rooted — Camelia flowered double type mixed.....	2.50		

Calceolaria

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well rotted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Sow the seeds lightly over the surface and cover the flat with a suitable covering. Calceolaria will germinate better when the temperature is cool, therefore, well shaded locations are better. August sowing will make large plants for May while November sowing will make good four inch plants. Some growers have used the wick irrigation method to germinate the seed with very good results.

Gilbert's Strains

This is an improvement over the original Multiflora Nana type. Compact habit of growth; good selection of colors in the mixture; excellent foliage.

	Tr. Pkt.
Multiflora Nana Red.....	\$1.00

FLOWER SEEDS

Candytuft

Candytuft should be sown in flats in January and transplanted when the first leaves appear. Plant in the bench or bed about Feb. 15th. Grow in a temperature of 45-50° and good crop may be secured by Memorial Day. Candytuft Giant Hyacinth Flowered White is the most satisfactory type for this method of culture.

Giant Hyacinth Flowered White — Very superior strain growing 1½ feet high, has immense trusses of bloom. We believe it the finest strain to be had.

Celosia—Gilbert's Maple Gold

Beautiful combs varying in color from light to dark pink tipped with Gold. Grows 2 to 3 feet high.

Originators Tr. Pkt. (300 seeds) \$.50

Centaurea Cyanus (Cornflower)

Listed below are the finest improved Florist strains of Centaurea Cyanus. The flowers are large, fully double and the colors intensified. The extra long stems of this strain make them excellent for cut flower purposes. Responds to additional light. Wilt of Centaurea Cyanus may be caused by a single soil born fungus of Verticillium which also causes Seidewitz disease or wilt of Chrysanthemums. The only prevention of this disease lies in the exclusive use of sterilized soil from the seed flats to the finished pot or bench soil. Do not invite trouble by planting this crop in old mum soil unless it is first sterilized.

Cineraria

Siter's Rainbow Strain — This Cineraria carries immense flower heads, is compact in growth and has small round leaves. The medium large flowers range in colors from the bright-eyed types to the finer pastel shades.

Packets: **\$2.00** each

Cremer's Prize Strain — This strain has been greatly improved by the originator — has small foliage that is wilt-proof with tremendous heads of flowers of the brightest colors.

Tr. Pkt. **\$1.50** 1/32 oz. **\$4.00** 1/16 oz. **\$7.50**

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. CINERARIAS are attacked by this wilt which is a soil borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flats to finished pot. If you do use old chrysanthemum soil be sure to sterilize it. **TO BE ON THE SAFE SIDE IT IS RECOMMENDED TO STEAM STERILIZE SOIL BEFORE USING.**

Cyclamen Dauernheim Strain

This strain is compact, free flowering and matures early. Tests have shown that it is more disease resistant and will do very well under conditions here in the States. The foliage is of medium size, the blooms well proportioned are particularly large, the white and white with eye often measuring six inches across.

Dauernheim's have selected and improved this strain for a number of years and in their trials have found this strain to be superior.

FLOWER SEEDS

Delphinium

Vetterle and Reinelt Pacific Strain

WE SUPPLY ONLY THE ORIGINATOR'S STRAIN

This is the finest strain of Delphinium yet introduced. From our personal observations in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense in size, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphinium's require a well drained soil, neutral in reaction. January sowing will produce flowers during the summer.

Black Knight

The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

Blue Bird Series

This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers $2\frac{1}{4}$ inches in diameter on very long, graceful spikes.

Bluejay Series

Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

Cameliard Series

A **pure lavender self**, with **white bee**, individual flowers, are very round and flat. Excellent growing habits.

Galahad Series

Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong whippy stems with a high percentage of mildew resistance.

Guinevere Series

Light Pink Lavender self with white bee. Individual florets $2\frac{1}{2}$ to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

King Arthur Series

Brilliant Royal Violet with large white bee. Individual florets $2\frac{1}{2}$ inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

Lancelot Series (New)

Clear Lilac self with white bee.

Percival Series (New)

A companion to the Galahad Series. Large **glistening white** flowers with strongly contrasting **black bee**.

Round Table Series

This represents **all the color combinations of the Knights and their Ladies** which will eventually be introduced. Some three hundred different crosses were used to make up this group.

Summer Skies Series

Clearest Light Blue with white bee. Individual florets 2 to $2\frac{1}{2}$ inches in diameter. Ideal for cut flower purposes. Mildew resistance—40 to 60%.

All Colors Mixed

A blend containing all named colors mentioned above. Prices for above varieties.

Dahlias

These are easy to raise from seed and are overlooked by many florists. Vast improvements have been made in these strains which come remarkably true to type and height. They are early flowering, blooming profusely the same year they are sown.

For small pot plant sales in the spring the seed should be started during January or February. To produce four inch pot plants for Mothers Day sow the seed in November.

Annual Larkspur

Giant Imperial or Base Branching

Tall upright compact, basal branching in habit, the Giant Imperials have superseded all other types of Larkspur for florists' and general garden use. The delphinium like spikes or double flowers, carried on stems 4'-5' long, are compactly placed on the upright growing plants, requiring only about one-half the space needed for the old stock flowered type of Larkspur.

Blue Bell — Azure blue.

\$.35	\$1.50	\$15.00

Larkspur seed may be sown directly in the open in the fall and will flower the following spring. There are two distinctly different methods used and each have a number of successful supporters. The first method is to sow the seed fairly early in the season about August 15th to September 15th. The small Larkspur seedlings will be sufficiently large enough when cold weather sets in to winter over when given a light mulch. The other method employed is to sow the seed in rows in late October or early November so that it will not germinate until early next spring. This crop of Larkspur will generally come in shortly after Delphinium Belladonna.

Gigantea

A remarkable new sweet scented, robust growing extremely large flowered type, ideal for show purposes, florist use and garden decoration. It has also been tested and found good for greenhouse culture.

Primula Primula Malacoides "Springtime"

SPRINGTIME is one of the finest Malacoides ever offered. This color is an attractive SALMON pink which does not fade with age. The flower stems are strong and support a profusion of good sized blooms; and unlike many other varieties of Malacoides, the foliage has good texture and is fairly resistant to rot. Thus the outstanding features of this variety are its pleasing salmon pink color, compact habit of growth and excellent keeping quality.

Seed sown in June will make good flowering plants for January. September sown seed will produce good plants for early Spring; while later sowings can be grown into small plants usable in combinations.

TRADE PACKET — \$2.00

Primula Malacoides Erikssoni

Mrs. Eriksson of Riverside—Rose red.

White	1.00	2.50	9.00
Yellow Wonder —Rich creamy yellow with full double florets well arranged on long spikes.....	1.00	3.50	12.00

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings. The non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling the largest and most vigorous plants should be selected.

Giants of California

(Branching)

The Giants of California can also be grown similarly to the non-branching type. When grown this way the side shoots should be removed. For the retail grower the branching types are gaining popularity. These should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

*—Six Best

Cuthbertson

SPRING FLOWERING

This new class of Sweet Peas has taken the place of the "Spring Flowering" types previously offered. Indoors, Seed should be sown November 1st, and such planting will start to bloom in April. **The Cuthbertson Class is recommended for sowing after November 1, and not earlier because they need the stronger Spring sun to bloom.**

They are exceptionally successful out of doors. In the North, they flower two weeks later than the Early Flowering, and two to three weeks earlier than the Summer Flowering.

Carol—Strong growing clear pink.

Coline—Vigorous sunproof scarlet.

Danny—Navy blue.

David—Bright rose crimson.

Evelyn—Salmon cream pink.

Frank G.—Strong growing lavender.

Hazel—Light blue.

Janet—A pure black seeded white. Extra large.

Jessie—Wavy flowers of clear satin mauve.

Katie—Rose cream pink.

Lois—Rose pink on white background.

Marion—Extra long stemmed cream pink.

Tommy—Clear medium blue.
